PROGRAMME REPORT

Date: 19/07/2017

Name of the programme : Advanced Pharmacological Methods & Techniques.

Date : 10/07/2017 to 15/07/2017

Details of resource person

1. Name : Mr.N.Kodandaram
2. Designation : Associate professor
3. Name of the organization : ASN Pharmacy college, Tenali.
4. Phone No : 9966425564
5. Mail id : norikodandaram@yahoo.com

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on Faculty Development Programme on Advanced Pharmacological Methods & Techniques for all the faculty members. The main objective of this program is to attain advanced practical knowledge in various analytical techniques in pharmacology.

Topic covered: Drug development process, common analytical techniques – Titrimetric Chromatography, Spectroscopy, Capillary electrophoresis, Hyphenated techniques.

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge.

1. Various Analytical techniques used in Pharmacology.
2. Stages of drug development.
3. Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude for her excellent delivery.

Number of participants: 33

About the College:

Narasaraopeta Institute of Pharmaceutical Sciences (NIPS), established in 2007, aims to provide quality pharmacy education with human values to rural aspirants to meet the requirements of pharmaceutical industry and health needs of the society, and to achieve the excellence in pharmaceutical research. The College has introduced the course of Pharm.D, for the first time under the JNTUK Kakinada. The college has well experienced teaching staff and 16 well equipped laboratories. The college is furnished with well developed infrastructure and well-defined instrumentation facilities. NIPS is an ISO 9001:2015 certified institution and approved by Pharmacy Council of India (PCI) & All India Council for Technical Education (AICTE), New Delhi, Government of Andhra Pradesh and affiliated to JNTUK, Kakinada.

About FDP:

Pharmacology a bio medical science, deals with the research, discovery, and characterization of chemicals which show biological effects and the elucidation of cellular and organismal function in relation to these chemicals. In contrast, pharmacy, a health services profession, is concerned with the application of the principles learned from pharmacology in its clinical settings; whether it be in a dispensing or clinical care role. In either field, the primary contrast between the two is their distinctions between direct-patient care, pharmacy practice, and the science-oriented research field, driven by pharmacology.

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on Recent Trends and Challenges in Pharmaceutical Education and Research for all the faculty members. The main objective of this program is how to implement novel techniques and awareness about these in current era.

Topic covered: Digital pharma, Information and communications technology, Technological innovations, Health technology assessment, E-prescription, Telecommunication.

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge in field of pharmacy.

1. Current trends in Pharmaceutical Research and Drug discovery.
2. Pharmaceutical education in India.
3. The future pharmacist has to be cognizant of these developments to guide the physician and the patient and to be a competent partner in the health care system.
4. The challenges facing by the pharmaceutical Industry.

Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude to for her excellent delivery.

About the FDP:

Harmonization of pharmacy education has to be made a global agenda that will encompass the developments that have taken place in basic, medical, pharmaceutical sciences in serving the needs and expectations of the society. The professional pharmacy curriculum is designed to produce pharmacists who have the abilities and skills to provide drug information, education, and pharmaceutical care to patients; manage the pharmacy and its medication distribution and control systems; and promote public health.

The mission of pharmaceutical education is to provide a curriculum, which by its content and presentation, enables the student to learn the knowledge, skills, and values necessary to meet the drug-related needs of patients in society. This primarily occurs in practice when the pharmacist delivers pharmaceutical care to a patient, thereby meeting an individual patient's drug-related needs. It also occurs at the professional level through education, research, and the development of policies and standards, and at the societal level through research, public education, and policy development, all directed toward the prevention of drug-related morbidity and mortality.

PROGRAMME REPORT

Date: 20/12/2017

Name of the programme : Recent advances in Therapeutic research with Special
Emphasis on Nano medicine.

Date : 11/12/2017 to 16/12/2017

Details of resource person

1. Name : Dr.P.Ravi Sankar
2. Designation : Professor
3. Name of the organization : Vignan College of Pharmacy, Vadlamudi.
4. Phone No : 9998516901
5. Mail id : bannuman35@gmail.com

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on recent advances in Therapeutic research with special emphasis on Nano medicine for all the faculty members. The main objective of this program is to utilize Nano material for efficient drug delivery and diagnosis leading to successful therapy in wide variety of diseases.

Topic covered: Advancements in drug delivery, mycosis vaccines, targeted drug delivery, advanced coating technology, challenges in research.

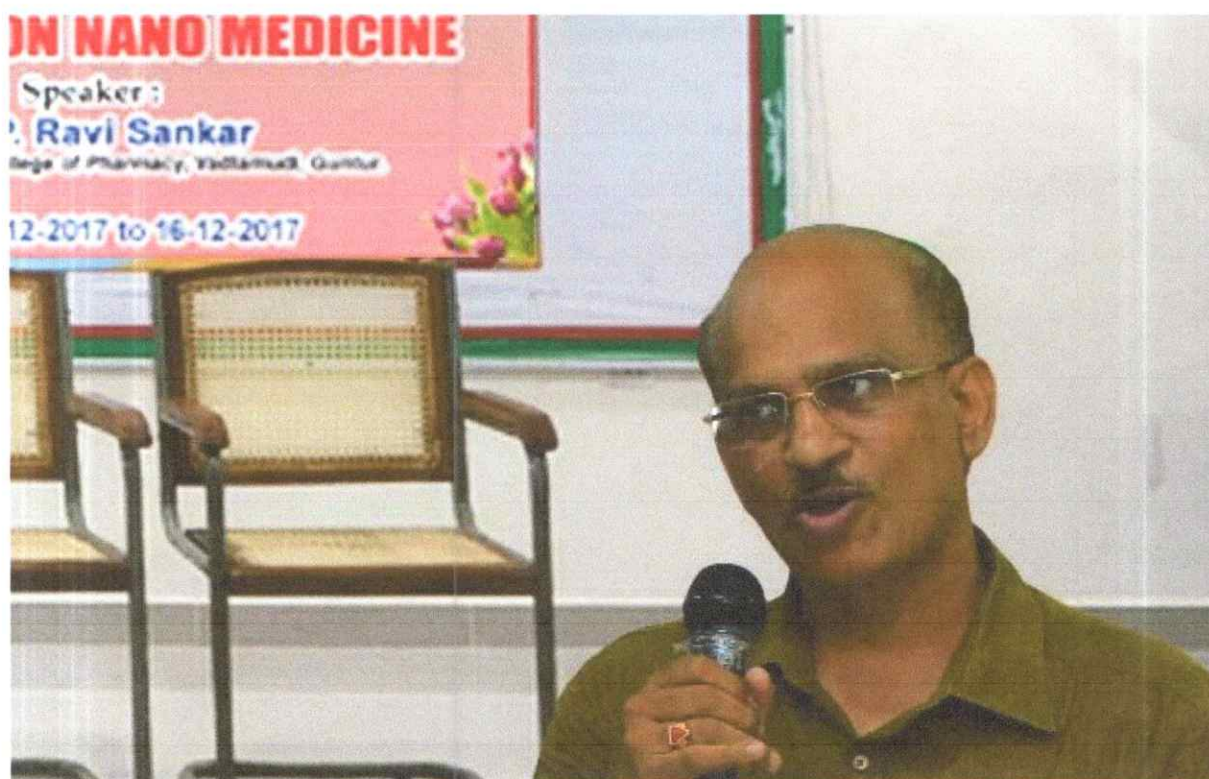

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge in health care.

1. Recent developments and advances in nano medicine.
2. Nanotechnology in Pharmacy.
3. Nano carriers for drug delivery.
4. Current Trends and Challenges in the Clinical Translation of Nano particulate Nano medicines.
5. Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude to for his excellent delivery.

Number of participants: 37

About the FDP:

Over the last years, nanotechnology has been introduced in our daily routine. This revolutionary technology has been applied in multiple fields through an integrated approach. An increasing number of applications and products containing nanomaterials or at least with Nano-based claims have become available. This also happens in pharmaceutical research. The use of nanotechnology in the development of new medicines is now part of our research and in the European Union (EU) it has been recognized as a key Enabling Technology, capable of providing new and innovative medical solution to address unmet medical needs. The application of nanotechnology for medical purposes has been termed nanomedicine and is defined as the use of nanomaterials for diagnosis, monitoring, control, prevention and treatment of diseases.

PROGRAMME REPORT

Date: 21/02/2018

Name of the programme : Academic Ethics and Plagiarism.

Date : 12/02/2018 to 17/02/2018

Details of resource person

1. Name : Dr. A.M.S. Sudhakar babu.

2. Designation : Principal & Professor

3. Name of the organization : A.M.Reddy Memorial College of Pharmacy, Narasaraopet.

4. Phone No : 9010937327

5. Mail id : dramssudhakarbabu@gmail.com

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on Academic Ethics and Plagiarism for all the faculty members. The main objective of this program is to recognize the occurrence of plagiarism in scientific writing and measures to prevent it.

Topic covered: Common forms of plagiarism, strategies to address plagiarism, addressing plagiarism: focus on both writing and research as inquiry processes, plagiarism detection software in India – Urkund and Turnitin, Tolerance limit of plagiarism, challenges using Anti-plagiarism tools.

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge.

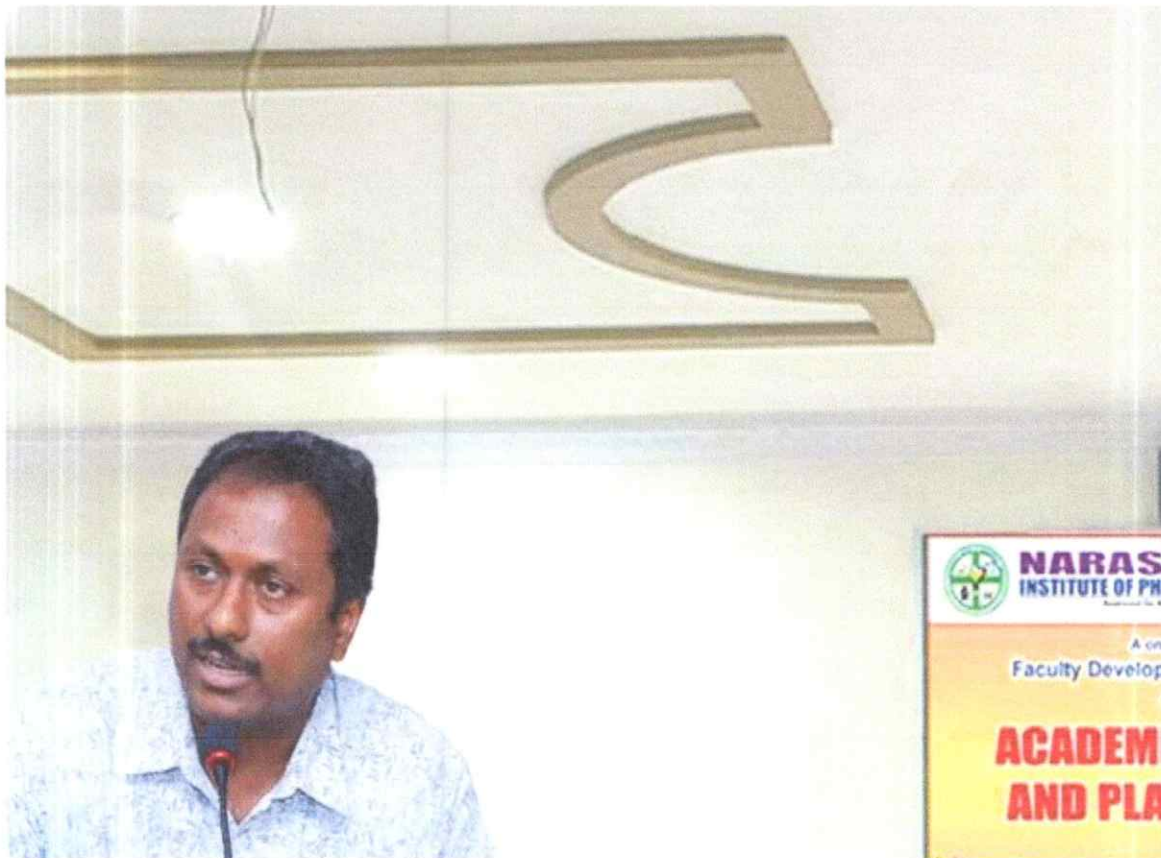

1. How to detect plagiarism using different softwares.
2. Providing the guidelines to succour students and faculty make responsible, moral, and ethical decisions related to all aspects of their association with the college.

Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude to for her excellent delivery.

About the College:

Narasaraopeta Institute of Pharmaceutical Sciences (NIPS), established in 2007, aims to provide quality pharmacy education with human values to rural aspirants to meet the requirements of pharmaceutical industry and health needs of the society, and to achieve the excellence in pharmaceutical research. The College has introduced the course of Pharm.D, for the first time under the JNTUK Kakinada. The college has well experienced teaching staff and 16 well equipped laboratories. The college is furnished with well developed infrastructure and well-defined instrumentation facilities. NIPS is an ISO 9001:2015 certified institution and approved by Pharmacy Council of India (PCI) & All Indian Council for Technical Education (AICTE), New Delhi, Government of Andhra Pradesh and affiliated to JNTUK, Kakinada.

About the FDP:

Plagiarism is a complex and evolving concept. The term plagiarism "is the use of others" published and unpublished ideas or words (or other intellectual property) without attribution or permission and presenting them as new and original rather than derived from an existing source" A common misconception is that consensus exists on what actions constitute plagiarism and whether engaging in plagiarism and other forms of academic dishonesty is a major breach of ethics. Plagiarism is a now a burning issue in education, industry and even in the research community, in need of reexamination. Intellectual property, a complex idea to begin with, is clearly in need of additional analysis and definition by both students and faculty.

PROGRAMME REPORT

Date: 13/3/2018

Name of the programme : Nanotechnology in Health care.

Date : 05/03/2018 to 10/03/2018

Details of resource person:

1. Name : Dr. M.Ravi Kumar
2. Designation : Principal & Professor
3. Name of the organization : Geetanjali College of Pharmacy, Hyderabad.
4. Phone No : 9348161224
5. Mail id : mravikumarg@yahoo.co.in

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on Nanotechnology in Health care for all the faculty members. The main objective of this program is to help physician in order to detect chemical changes on the spot using nano-scale diagnostic devices throughout the body.

Topic covered: History of Nanotechnology, Hibb's idea on Nanotechnology in medicine, classification of Nano materials, Applications of medical Nano technology, FDA approved Nano drugs.

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge in health care.

1. Using Nanoparticles to detect tumors in drug delivery system.
2. Benefits and applications of Nanotechnology in Health care.

Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude to for her excellent delivery.

NANO TECHNOLOGY IN HEALTH CARE

Date: 05/03/2018 to 10/03/2018

Venue: Seminar Hall, NIPS

NANOTECHNOLOGY

About the College:

Narasaraopeta Institute of Pharmaceutical Sciences (NIPS), established in 2007, aims to provide quality pharmacy education with human values to rural aspirants to meet the requirements of pharmaceutical industry and health needs of the society, and to achieve the excellence in pharmaceutical research. The College has introduced the course of Pharm.D, for the first time under the JNTUK Kakinada. The college has well experienced teaching staff and 16 well equipped laboratories. The college is furnished with well developed infrastructure and well-defined instrumentation facilities. NIPS is an ISO 9001:2015 certified institution and approved by Pharmacy Council of India (PCI) & All Indian Council for Technical Education (AICTE), New Delhi, Government of Andhra Pradesh and affiliated to JNTUK, Kakinada.

Objective:

Nanotechnology is already leading to dramatic improvements in health care. Scientists are using nanoparticles to target tumors, in drug delivery systems, and to improve medical imaging. Some nanoparticle-based treatments are multi-functional they can both find tumors and carry drugs for treatment.

PROGRAMME REPORT

Date: 28/05/2018

Name of the programme : Innovations In drug delivery systems.

Date : 21/05/2018 to 26/05/2018

Details of resource person

1. Name : Dr. Mohan Raj Ratnavelu
2. Designation : Associate Professor
3. Name of the Organization : Raghavendra Institute of Pharmaceutical Education
And Research, Anantapur.
4. Phone No : 9654821731
5. Mail Id : ratnaveluRiper@Yahoo.Com

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on Innovations in drug delivery systems for all the faculty members. The main objective of this program is to improve the biopharmaceutical features of the delivered compounds using vesicular carriers such as (liposomes, Ethosomes, ultradeformable liposomes), nano- and microparticles, innovative gels, microemulsions.

Topic covered: Carrier – based drug delivery systems, Transdermal drug delivery systems, Mucoadhesive drug delivery systems, Osmotically controlled drug delivery systems, Drug devices.

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge in health care.

1. Advantages and disadvantages of targeted drug delivery.
2. Advances in targeted drug delivery.
3. Innovations in transdermal drug delivery.
4. Classifications of drug delivery system.

Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude to for her excellent delivery.

**INNOVATIONS IN DRUG
DELIVERY SYSTEMS**

Date: 21.05.2018 to 26.05.2018

PRINCIPAL
NARASARAOPETA INSTITUTE OF
PHARMACEUTICAL SCIENCES
Kotappakonda Road, YELLAMANDA (PO)
NARASARAOPET - 522 601
Guntur (DL), A.P

Objective

New and emerging drug delivery systems for traditional drugs and the products of biotechnology are discussed, and the role of the pharmacist in ensuring the appropriate use of these systems is outlined. Advantages of advanced drug delivery systems over traditional systems are the ability to deliver a drug more selectively to a specific site; easier, more accurate, less frequent dosing; decreased variability in systemic drug concentrations; absorption that is more consistent with the site and mechanism of action; and reductions in toxic metabolites. Four basic strategies govern the mechanisms of advanced drug delivery: physical, chemical, biological, and mechanical. Oral drug delivery systems use natural and synthetic polymers to deliver the product to a specific region in the gastrointestinal tract in a timely manner that minimizes adverse effects and increases drug efficacy. Innovations in injectable and implantable delivery systems include emulsions, particulate delivery systems, micromolecular products and macromolecular drug adducts, and enzymatic-controlled delivery. Options for noninvasive drug delivery include the transdermal, respiratory, intranasal, ophthalmic, lymphatic, rectal, intravaginal, and intrauterine routes as well as topical application. Rapid growth is projected in the drug delivery systems market worldwide in the next five years. Genetic engineering has mandated the development of new strategies to deliver biotechnologically derived protein and peptide drugs and chemoimmunoconjugates. The role of the pharmacist in the era of advanced drug delivery systems will be broad based, including administering drugs, compounding, calculating dosages based on pharmacokinetic and pharmacodynamic monitoring, counseling, and research. The advent of advanced drug delivery systems offers pharmacists a new opportunity to assume an active role in patient care.
