PROGRAMME REPORT

Date: 06/07/2016

Name of the programme : Design Thinking: A Patient Centric Approach in Healthcare Industry.

Date : 27/06/2016 to 02/07/2016.

Details of resource person

1. Name : Dr.P.Ravi Sankar
2. Designation : Professor
3. Name of the organization : Vignan college of Pharmacy,
Vadlamudi, Guntur.
4. Phone No : 9441014932
5. Mail id : bannuman35@gmail.com

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on Design Thinking: A Patient Centric Approach in Healthcare Industry for all the faculty members. The main objective of this program is to determine how Design Thinking is used in health care and whether it is effective in health care.

Topic covered: Health care innovation, design thinking process, thinking process for better outcomes, Patient safety and quality

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge in health care.

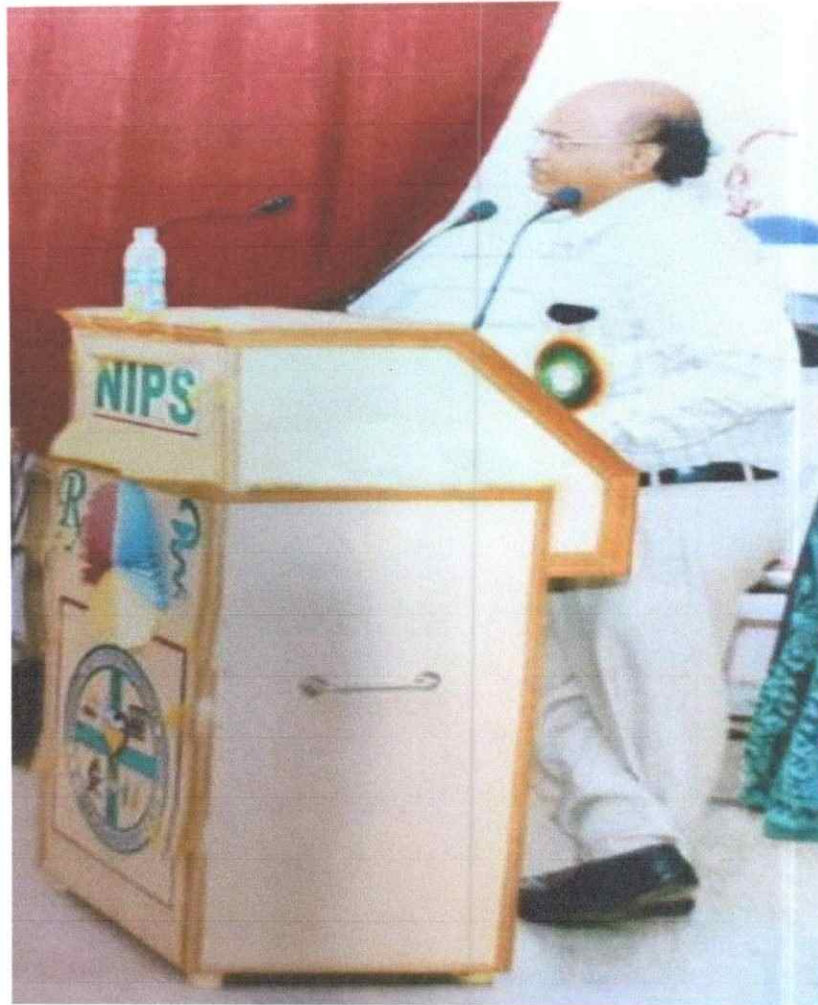

1. Deeper understanding of different approaches to solve patient's problems.
2. Achieving better clinical outcomes
3. Improved patient experience.

Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude to Dr. G. Sudhakar Rao for his excellent delivery.

Number of participants: 35

About the College:

Narasaraopeta Institute of Pharmaceutical Sciences (NIPS), established in 2007, aims to provide quality pharmacy education with human values to rural aspirants to meet the requirements of pharmaceutical industry and health needs of the society, and to achieve the excellence in pharmaceutical research. The College has introduced the course of Pharm.D, for the first time under the JNTUK Kakinada. The college has well experienced teaching staff and 16 well equipped laboratories. The college is furnished with well developed infrastructure and well-defined instrumentation facilities. NIPS is an ISO 9001:2015 certified institution and approved by Pharmacy Council of India (PCI) & All Indian Council for Technical Education (AICTE), New Delhi, Government of Andhra Pradesh and affiliated to JNTUK, Kakinada.

Objective:

Patient-centric or Patient Led approaches are about challenging health care's thinking and practice to put the needs and perspective of the patient at the heart of the innovation process. It is also about prompting health care organizations to include the patient at the center of the process as opposed to somewhere down the line. The patient is co-creating his experience and his diagnostic, he is no longer a simple object of study but rather an active stakeholder of his disease.

About FDP:

Skill intensive industries, such as manufacturing and services, are expected to contribute more than 90% of India's GDP by 2030. Hence skill development has been taken as a priority project by the present Government, led by our worthy Prime Minister, Mr. Narendra Modi. Countries such as Brazil, China, Germany, Switzerland, UK, Canada, US, Japan and S. Korea boast of between 50-97% of their workforce being skilled, India's skilled workforce is under 5%. This dismal situation is driven by factors like out-dated academic curricula, shortage of quality faculty, high student-teacher ratio, lack of Institutional-industry linkages and lack of autonomy to introduce new and innovative courses. It is the same situation in thousands of pharmacy institutions and education imparted by them. The unskilled pharmacy students are being avoided by the employers. The situation needs to be changed urgently and the level of skills of pharmacy students is required to be enhanced to help them enter active life, the world of work, and society, which is becoming extremely competitive day-by-day.

Name of the programme : Insights into Drug Discovery and Development (IDDD).

Date : 10/10/2016 to 15/10/2016

Details of resource person

1. Name : Dr.S.Sri Ram
2. Designation : Professor
3. Name of the organization : Ramakrishna College of Pharmaceutical Sciences, Coimbatore.
4. Phone No : 9912731043
5. Mail id : ssram75@gmail.com

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on Insights into Drug Discovery and Development (IDDD) for all the faculty members. The main objective of this program is to recognize the new molecular entities that may be helpful in the treatment of diseases to qualify unmet medical needs.

Topic covered: Drug discovery, Procedure for drug discovery, Drug development, Steps involved in drug development, Pre-clinical and clinical evaluations, Phases of clinical trials.

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge in health care.

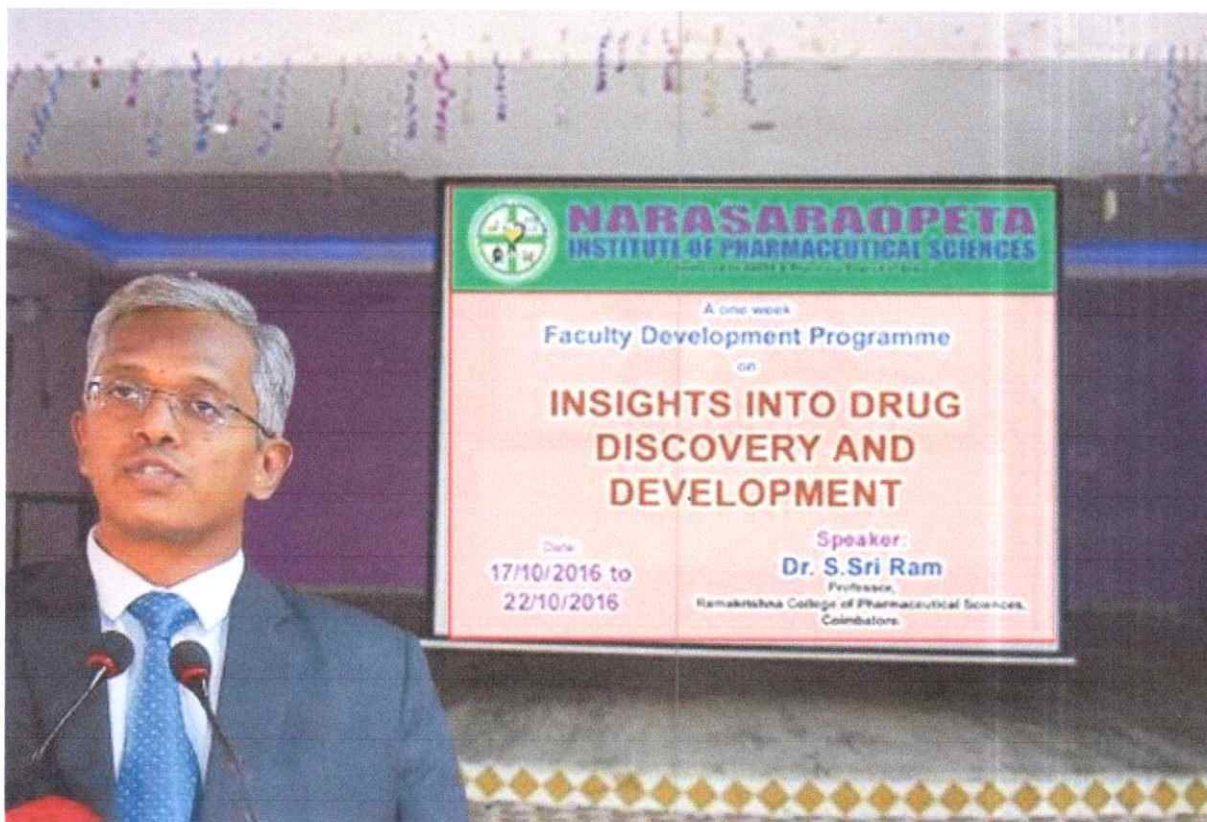

Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude to for her excellent delivery.

1. Understanding the process of drug discovery and development.
2. Different phases of clinical trials.
3. To design a product to stop or reverse the effects of the disease.

About the College:

Narasaraopeta Institute of Pharmaceutical Sciences (NIPS), established in 2007, aims to provide quality pharmacy education with human values to rural aspirants to meet the requirements of pharmaceutical industry and health needs of the society, and to achieve the excellence in pharmaceutical research. The College has introduced the course of Pharm.D, for the first time under the JNTUK Kakinada. The college has well experienced teaching staff and 16 well equipped laboratories. The college is furnished with well developed infrastructure and well-defined instrumentation facilities. NIPS is an ISO 9001:2015 certified institution and approved by Pharmacy Council of India (PCI) & All Indian Council for Technical Education (AICTE), New Delhi, Government of Andhra Pradesh and affiliated to JNTUK, Kakinada.

Objective:

Drug discovery can be described as the process of identifying chemical entities that have the potential to become therapeutic agents. A key goal of drug discovery campaigns is the recognition of new molecular entities that may be of value in the treatment of diseases that qualify as presenting unmet medical needs. The traditional pharmaceutical research and development process suffers from a high attrition rate. For every new drug brought to the market, most estimates suggest that researchers will typically have employed over 100 screens looking for drug leads, winnowing down candidates from tens of thousands of compounds (Figure 30.1). Lead compound discovery research is also costly and time-consuming, taking by some estimates over 5 years and > \$200 million, not including the even more substantial time and costs associated with drug development. Carefully thought-out and employed strategies for drug discovery are therefore needed, particularly when entering new drug target or disease arenas.

PROGRAMME REPORT

Date: 14/12/2016

Name of the programme : Innovations and Technology Developments in Pharmaceutical Sciences.

Date : 05/12/2016 to 10/12/2016

Details of resource person

1. Name : Dr. Shanmuga Sundaram
2. Designation : Director & Dean
3. Name of the organization : Vels university, Chennai.
4. Phone No : 9989921747
5. Mail id : shanmugasundaram11@gmail.com

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on Innovations and Technology Developments in Pharmaceutical Sciences for all the faculty members. The main objective of this program is to access the patient medical information to improve the quality of life by innovating technologies like Artificial intelligence etc.

Topic covered: 3D printing, m Health sensors, Organ- On- chip technology, Tru medicine, and Culture independence strategy.

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge in health care.

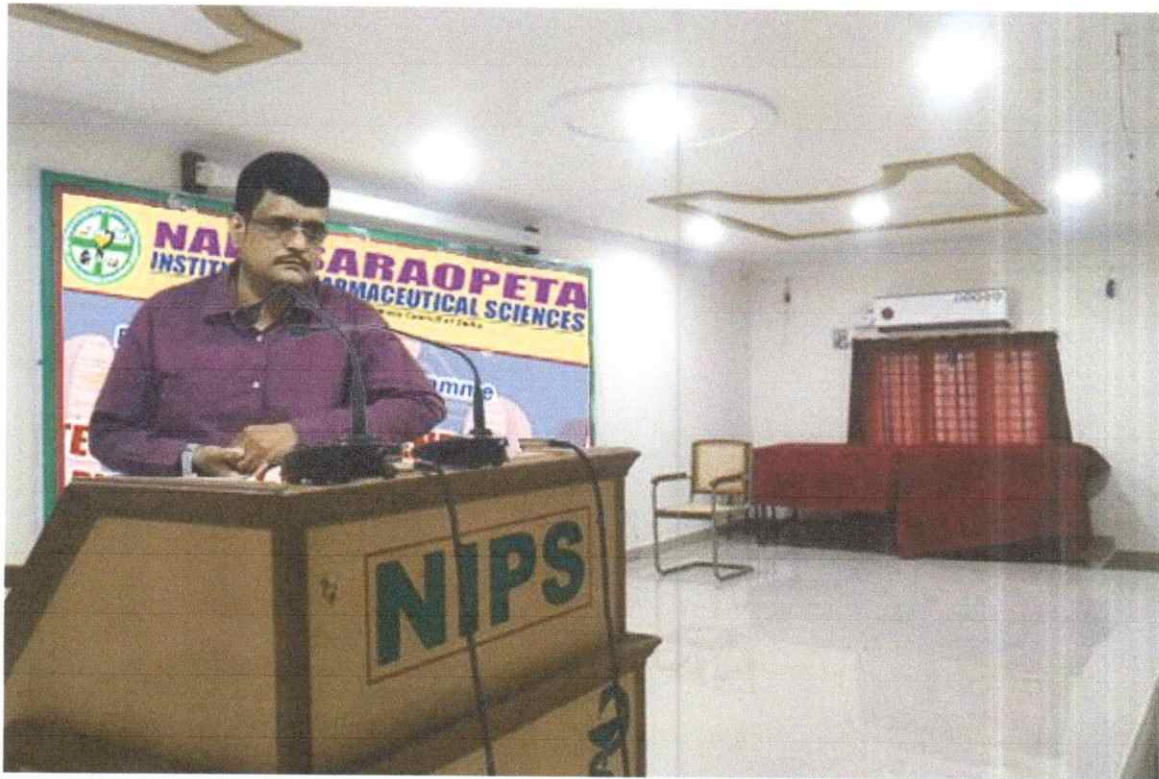

1. New Technology or Medications to improve quality of life.
2. Understanding on how technology boosted pharmaceutical industry.
3. Novel innovations in Pharmaceutical Industry.

Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude to for her excellent delivery.

About FDP

For more than a decade, analysts of the pharmaceutical industry have argued that the conventional blockbuster model of drug discovery and development is unsustainable, despite many years of investment in new life science technologies. Explanations have included a failure of innovation capacity and low productivity, a focus on incremental rather than radical innovation, excessive regulatory barriers and a lack of venture capital investment. However, an alternative argument can be posed that the pharmaceutical innovation model has been remarkably resilient and multinational companies have been extremely robust in maintaining their market dominance.

About the College:

Narasaraopeta Institute of Pharmaceutical Sciences (NIPS), established in 2007, aims to provide quality pharmacy education with human values to rural aspirants to meet the requirements of pharmaceutical industry and health needs of the society, and to achieve the excellence in pharmaceutical research. The College has introduced the course of Pharm.D, for the first time under the JNTUK Kakinada. The college has well experienced teaching staff and 16 well equipped laboratories. The college is furnished with well developed infrastructure and well-defined instrumentation facilities. NIPS is an ISO 9001:2015 certified institution and approved by Pharmacy Council of India (PCI) & All Indian Council for Technical Education (AICTE), New Delhi, Government of Andhra Pradesh and affiliated to JNTUK, Kakinada.

Objective: Narasaraopeta Institute of Pharmaceutical Sciences had successfully organized FDP program on Innovative Teaching Learning Practices and Research for all the faculty members. The main objective of this program is to develop a skill to stimulate experience in the teaching with innovative teaching techniques.

Topic covered: conventional and non-conventional methods of teaching, Exploring innovative teaching techniques, Ideas for innovative teaching by Microsoft, Mnemonics.

Programme outcome: An open feedback was collected from all the faculty and they expressed that the program helped them to improve their knowledge in teaching and learning.

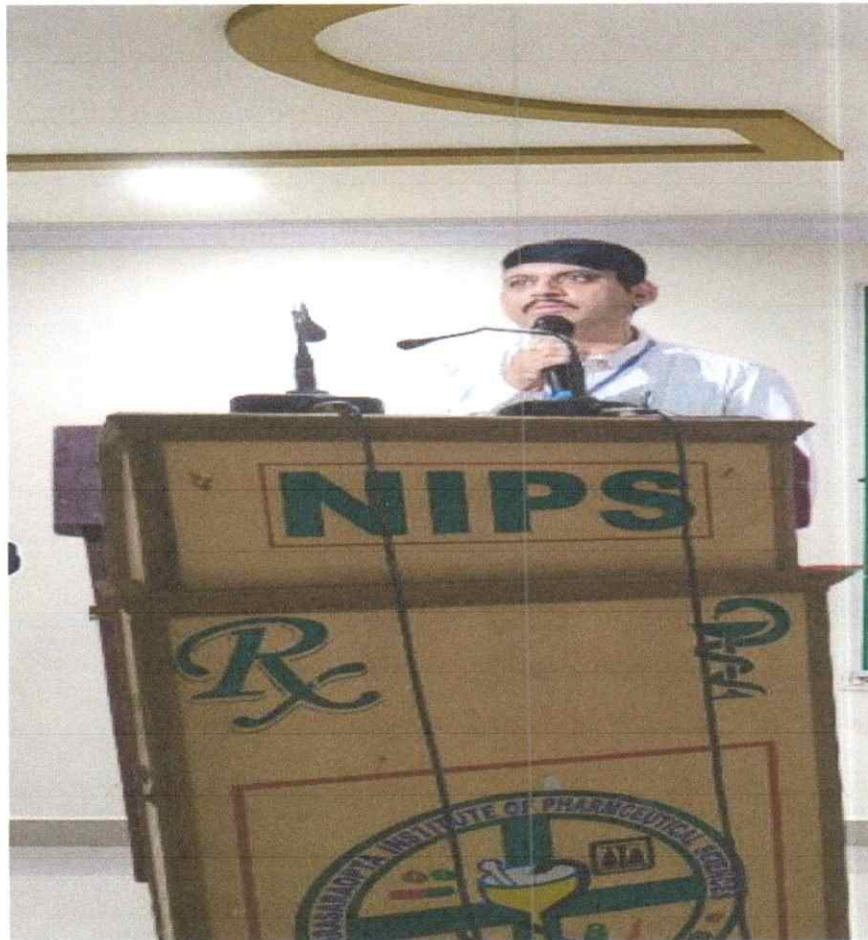

1. Strategic Use of digital technologies to connect, create and share learning.
2. Better aftermath at college environment.
3. Distinct Practices for teaching and learning.

Principal Dr. J. N. Suresh Kumar and the management expressed their gratitude to for her excellent delivery.

INNOVATIVE TEACHING, LEARNING PRACTICES AND RESEARCH

Date: 27-03-2017 to 1-04-2017

Venue: Seminar Hall, NIPS

About the College:

Narasaraopeta Institute of Pharmaceutical Sciences (NIPS), established in 2007, aims to provide quality pharmacy education with human values to rural aspirants to meet the requirements of pharmaceutical industry and health needs of the society, and to achieve the excellence in pharmaceutical research. The College has introduced the course of Pharm.D, for the first time under the JNTUK Kakinada. The college has well experienced teaching staff and 16 well equipped laboratories. The college is furnished with well developed infrastructure and well-defined instrumentation facilities. NIPS is an ISO 9001:2015 certified institution and approved by Pharmacy Council of India (PCI) & All Indian Council for Technical Education (AICTE), New Delhi, Government of Andhra Pradesh and affiliated to JNTUK, Kakinada.

About FDP:

Across the Internet where massive amounts of data are being created every second. Widely known as the big data, this tool can be signified as the techniques to capture, store and analyse data of resources. It enables us to provide instrumental means in formulating data such as for communication, sending information and online activities purpose. Moreover, it can also offer innovative teaching and learning for higher learning institution. This study aims to discuss the teaching based on big data application and practices to enhance innovation in teaching, learning, sociality, and technology for students. In this study, we deploy thematic analysis to construct a model for higher institutions to regulate their scenario on big data application. The findings reveal that it can be used to improve decision-makings, provide insights, knowledge discoveries, and optimise learning processes. Higher learning institution can adopt big data analytics-based teaching and learning strategy to sustain in providing innovative teaching and learning experience to the students with opportunities to improve learning experiences to them with big data analytics. In fact, students nowadays rely on online resources and at the same time they produce data for sharing purposes.

Programme Report

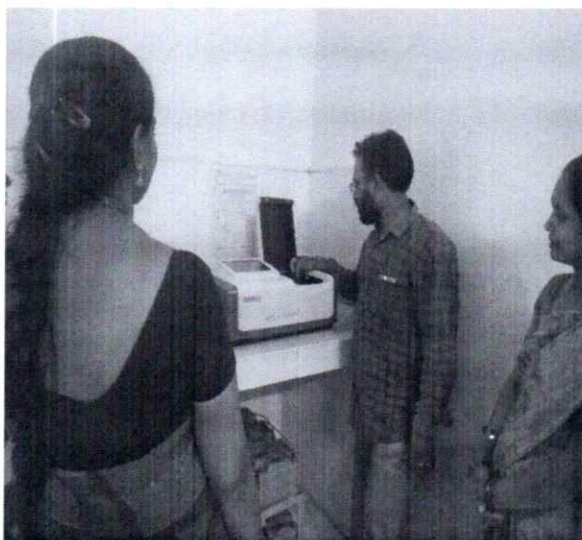

1. Programme Name : One day training programme on Handling of UV-Visible Spectrophotometer
2. Date and time : 4th July 2016, 11:00 AM
3. Conducted by : Department of Pharmaceutical Analysis
4. Program Instructor : Mr. B. Satya Prasad and Mr. K.V. Ramanjaneyulu.
5. Objectives of the program :

One day Training on “Handling of UV-Visible Spectrophotometer” Was conducted in Pharmaceutical Analysis Laboratory at Narasaraopeta Institute of Pharmaceutical Sciences on 4th July 2016. The programme was conducted to demonstrate on handling and operation of UV-Visible Spectrophotometer, Handling and cleaning of cuvettes, preparation of solvents etc.
